Advantages

- \+ For the universal disinfection of alcohol-tolerant surfaces
- \+ Scent: lemon
- \+ Reclosable dispenser box

Properties
Ready-to-use alcoholic wipes – selected lint-free nonwoven fabrics for excellent microbiological performance according to the EN16615 test procedure, with bonded fibers, extremely broad spectrum of activity for the highest demands, effective within 2 minutes under heavy use, practical and easy application and dispensing from the dispenser box, "one-handed dispensing" thanks to special sheet perforation with a large, pre-pulled core, convenient printing for maximum regulatory compliance with minimal documentation, long shelf life in the dispenser box (verified), evaporates quickly and leaves no residue, approved as a biocide and medical device (dual use).

Preparation type
Ready-to-use, pre-moistened wipes for the rapid disinfection of medical equipment and patient-contact and hygienically critical areas. The practical dispenser box allows for individual wipe removal and quick deployment.

Areas of application
According to the German Medical Devices Act (MPG): Alcoholic wipes for the prophylactic surface disinfection of alcohol-resistant medical devices. Not suitable for terminal disinfection of invasive medical devices.

According to the Biocidal Products Regulation: Alcoholic wipes for the rapid disinfection of alcohol-resistant surfaces.

Instructions for use
Wipe surfaces and objects until completely wet and allow the disinfectant to take effect. After the contact time has elapsed, wipe again with a disposable cloth if necessary. Suitable for use only on alcohol-compatible materials (not suitable for acrylic glass). The microbiological requirements for the quality of the rinsing water are at least drinking water quality.

Fibre composition
100g of impregnating liquid contains: 43.0g ethanol; 8.0g 1-propanol; 0.055g didecyldimethylammonium chloride

Application times
Contact times for wipe systems:

Bacteria and Candida albicans according to EN 16615 with high contamination: Concentrated solution 2 min.

Based on the impregnation solution:

Bacteria according to EN 13727 and EN 13697 (high contamination): Concentrated solution 1 min.

Candida albicans according to EN 13624 and EN 13697 (high contamination): Concentrated solution 1 min.

TbB inactivation according to EN 14348 (M. terrae) with high contamination: Concentrated solution 1 min.

Enveloped viruses according to DVV/2012 in surface testing with high contamination: Concentrated solution 1 min.

Adenoviruses according to EN 14476 with high contamination: Concentrated solution 1 min.

Noroviruses according to EN 14476 with high contamination: Concentrated solution 1 min.

Rotaviruses according to EN 14476 with high contamination: Concentrated 1 min

Bactericidal (incl. MRSA), yeasticidal (Candida albicans), tuberculocidal (M. terrae), “limited virucidal PLUS” (effective against enveloped viruses such as HBV, HIV, HCV) and non-enveloped adenoviruses, noroviruses, rotaviruses

Safety instructions
H228 Flammable solid. Keep away from heat, sparks, open flames, and hot surfaces. No smoking. Wear protective gloves and eye protection. Store in a closed container.

Sales

Distribution in accordance with the Biocidal Products Regulation only in Germany
